

Machine Learning Associate

InnovateTech Solutions (Demo Company)

Location: Bengaluru, India (Hybrid)	Job Type: Full-Time
Experience Required: 0 - 1 Years (Fresher)	

Minimum Eligibility Criteria

- Maximum of 1 year of professional experience in software or data roles.
- No active backlogs in undergraduate/postgraduate courses.
- Available to start full-time employment immediately within 30 days.

Education Requirements

- B.E. / B.Tech / M.Tech in Computer Science, Data Science, IT, or related quantitative fields.
- Strong academic foundational knowledge in Linear Algebra, Probability, Statistics, and Calculus.

Required Technical Skills (Mandatory)

- Proficient core programming in Python, including libraries like NumPy, Pandas, and Scikit-Learn.
- Strong understanding of foundational ML algorithms (Regression, Classification, Clustering, Trees).
- Basic knowledge of writing SQL queries to extract and filter data from relational databases.
- Familiarity with version control workflows using Git and GitHub.

Preferred Technical Skills

- Basic exposure to Deep Learning frameworks such as TensorFlow or PyTorch.
- Familiarity with Cloud platforms (AWS / GCP / Azure) for fetching data or deploying simple scripts.
- Basic understanding of data cleaning, exploratory data analysis (EDA), and data visualization toolkits.

Job Responsibilities

- Collaborate with senior data scientists and engineers to clean, preprocess, and structure raw data datasets.
- Implement, test, and tune standard machine learning baselines and algorithms on curated data pipelines.
- Assist in documenting experiment logs, model performance configurations, and analytical outcomes.
- Participate in code reviews, stand-ups, and contribute actively to solving engineering pipelines.

Nice to Have

- Active participation or high rankings in Kaggle or related competitive data science challenges.
- Personal projects or contributions open-sourced on GitHub demonstrating clean ML modeling pipelines.
- Prior short-term internship experience working closely on data or backend product modules.
